DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas (5,006,952) in view of Sharp et al. (4,493,219).

Thomas discloses a substantially rigid, force-sensing joystick, comprising:

a handle 12 (figs. 1-3);

conductive drive plate 22;

segmented conductive surface A-D (on 28); and

force applied to the handle causes deflection of the plate 22 (see fig. 1).

Regarding claim 2, Thomas discloses four segments, see fig. 2.

Regarding claim 4, the plate 22 is non-segmented. Further, the conductive surface A-D is a part of a printed circuit board 28.

Regarding claims 5, 8 and 12, the surface A-D requires no soldering connection to the circuit board (see col. 3, lines 10-40).

Thomas teaches the claimed invention except for the handle having one or more electrical control thereon. Sharp teaches a joystick handle 100 (fig. 14) having an electrical control 116 thereon to control a z-axis actuator.

Art Unit: 2832

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the joystick handle of Thomas with the actuator control as taught by Sharp, since the device of Sharp would provide the joystick of Thomas with additional Z-axis actuator means.

Regarding claims 6-7 and 9, please see above.

Regarding claims 10-11 and 13, please see fig. 1 of Thomas.

Regarding claims 14 and 15, see fig. 14 of Sharp.

Response to Arguments

3. Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.
